

Jaheim Daniels

jaheimadaniels@gmail.com | [linkedin.com/in/jaheim-daniels/](https://www.linkedin.com/in/jaheim-daniels/) | Toronto, ON, Canada

EDUCATION

Lassonde School of Engineering - York University
Bachelor of Science, Hons. Computer Science (Co-op)

Toronto, ON, Canada
Expected Aug. 2027

EXPERIENCE

Help Desk Technician (Co-op)

Castrol-Wakefield Canada Inc

May 2026 – Present

Mississauga/Etobicoke, ON, Canada

- Resolved 100+ **Tier 1** incidents involving Microsoft 365, Windows 11, printers, user accounts, MFA and VPN connectivity by providing in-person and remote support through Spiceworks, Microsoft Teams and ScreenConnect
- Managed user accounts, password resets, access permissions and device enrollment through Microsoft 365 Admin Center, enabling users to securely access required systems and resources
- Improved network infrastructure organization by collaborating with network teams to label and organize Ethernet cabling and assist with network equipment migrations
- Resolved iOS and Android device issues involving Microsoft 365 (Teams, Outlook, Authenticator), dropped calls and SMS failures by analyzing device settings and group assignments, restoring mobile communication and application functionality
- Supported the deployment of 10+ workstations by installing dual monitors, monitor arms, docking stations and other peripherals, ensuring users had fully equipped workstations for daily operations
- Improved ticket handoffs by documenting troubleshooting steps before escalating complex incidents to senior support teams, enabling quicker diagnosis and resolution

Information Technology Assistant

Lassonde School of Engineering - York University

Jan. 2026 – Apr. 2026

Toronto, ON, Canada

- Addressed 10–15 weekly **Tier 1** service requests and incidents within established **SLAs** by providing front-line **service desk** support via in-person, Zoom, telephone and email channels using **ServiceDesk Plus** and **HaloITSM**
- Deployed and imaged 30+ laptops using Clonezilla via **USB** for individual devices and **PXE** for mass deployment, configuring **BIOS/UEFI** settings and installing institution-approved software
- Minimized service disruptions across 20+ classrooms, performing first-level troubleshooting on Windows 11 workstations, AV rack hardware and Crestron touch panels
- Improved clarity and accessibility for end users and IT staff by auditing and updating technical documentation to eliminate knowledge gaps and remain updated with trends

Network & IT Intern

Cable & Wireless Communications

Aug. 2023

British Virgin Islands

- Enhanced **network performance** and broadband expansion by installing and organizing 40–50 ft **fiber optic** cables across the **data center**, connecting **Optical Distribution Frames (ODFs)** to **Provider Edge (PE)** nodes
- Reduced service restoration time by collaborating with field technicians at 3 cell sites to troubleshoot and resolve **network outages**

TECHNICAL SKILLS

IT Support: Microsoft 365 Admin Center (Intune, Teams, Exchange, Entra ID), Power BI, Outlook, SharePoint, Ticketing Systems, TeamViewer, Scripting (Python, PowerShell)

Cloud: AWS (IAM, EC2, CloudWatch), Azure, Docker

Systems & OS: Windows 10/11, MacOS, iOS, Android, Windows Server 2025, Active Directory, Linux (Ubuntu), VirtualBox

Networking: TCP/IP, DNS, DHCP, SSH, LAN/WAN, Wireshark

PROJECTS

Active Directory Lab | *Windows Server, Active Directory, Group Policy, PowerShell, Virtual Box*

- Built a virtualized Windows Server environment by deploying an Active Directory domain controller with integrated DNS and joining Windows client machines to the domain
- Administered users, security groups, Organizational Units (OUs), and permissions while applying Group Policy Objects (GPOs) to manage domain-joined Windows clients

5 Stage Pipelined CPU | *Computer Architecture, Pipelines, ISA, Control Unit Design*

- Implemented a 5-stage pipelined CPU (Instruction Fetch, Instruction Decode, Execute, Memory Access and WriteBack) in Verilog enabling instruction-level parallelism to improve efficiency
- Validated pipeline functionality through structured testing with a 10+ instruction RAM program, achieving 100% test coverage
